

# Teach Yourself

with The Best Tutorial in its Class  
MACWORLD Magazine

**The Proven Way To Learn Any  
MS-DOS or Macintosh Application**

## *From the Pundits:*

The association of Tutorland training knowhow and your software will lead you on a great road of productivity. Bravo to Tutorland for the quality of its training tools.

- Michel Lacombe,

PRESIDENT, MICROSOFT France

"A Touch of Class"

- MacUser Magazine

The Best Tutorial in its Class - MACWORLD Mag.

## *... and to the troops:*

I love it! A, B, C..., plain and simple. Easy to learn. I have bought all your tutorials.

- C. Mediros, HMB Company

Very helpful - Got me up and running quickly.

- J.F. Borst, Puyallup

Excellent training material.

- G.B. Malloy, National Liberty Corp.

I haven't seen material this good. I'm very

impressed. - Dr. Kent Cochran, Apple Computer

*Learning Never Was Easier*

TM

# Straight Talk!

## *What products does Tutorland carry?*

Tutorland publishes The Training Guide Series for self-paced learning and The Classroom Series for instructor-led training. Check the product information sheet to see what is currently available.

## *What is a Training Guide?*

The Training Guide Series are disk and workbook based tutorials. In each of our tutorials you learn to use the software by working through a realistic example, something that you run into everyday. That way when you want to create a spreadsheet or a classy brochure, you're no stranger since you've already been through the steps before. With instructions for both the mouse and keyboard, most of these all inclusive modules are equivalent to a full two-day training session, but can be completed in six to ten hours, at your own pace and at your convenience.

## *What is The Classroom Series?*

For instructors offering private or company courses, Tutorland publishes The Classroom Series. These come with an Instructor's manual with master training disks, and ten additional student guides.

## *Who is it designed for?*

Training Guides are designed for those who are new to computers as well as for those who are adept users but wish to learn all the advanced capabilities of the application. They are not written for developers.

## *How many modules will I have to buy to learn the entire software?*

This depends on the application and on your familiarity. If you feel that all you need to know is programming in dBase or perhaps wish to brush up on your macros in Excel then you may get just that. However, since the price difference between an individual module and the all inclusive one (where available), is so little, we suggest the latter. That way, you don't miss a thing and make a great saving in the process.

## *What can I expect to achieve by going through a TUTORLAND Training Guide?*

- With a word processor you will be able to create a document of any complexity
- create a professional-looking newsletter or advertisement using desktop-publishing software
- do a business forecast or one's personal taxes using a spreadsheet
- design a customized database with customer records, create different types of files, do client management, control inventory and generate invoices automatically.

## *O.K. So your product shakes, rattles and rolls. For how much?*

We like to save the best for last. The prices for different products vary. So, call or write us and have the most current information sent to you.

## *But wait, I have more questions.*
